Summary

Experienced Full-Stack Developer with 3+ years of experience building web applications using TypeScript, Node.js, and PostgreSQL. Strong background in frontend development with React and modern UI libraries. Experienced in agile environments and fast-paced teams.

Skills

- Languages: JavaScript, TypeScript, HTML5, CSS3
- Frontend: Next.js, React, Redux, React Query, MUI, Tailwind, Storybook
- Backend: Node.js, NestJS, PostgreSQL, MongoDB
- Cloud & DevOps: AWS, AWS Lambda, Gitlab CI/CD, Github Actions
- Tooling & Testing: NPM, Git

Experience

Software Engineer (Full-Stack), Banae – Skopje, Macedonia May, 2025 - Present

- Delivered scalable React.js, Next.js applications with reusable component architecture, improving development efficiency and maintainability
- Enhanced application performance, accessibility, and UX through optimization techniques and clean, modular code practices
- Streamlined development and deployment processes by integrating APIs (Node.js, Strapi) and contributing to CI/CD pipelines with Jenkins and Git

Software Engineer (Full-Stack), Synergi – Skopje, Macedonia Jan, 2023 - May, 2025

- Delivered end-to-end features in React and Node.js, improving performance and user experience
- Engineered real-time data systems using WebSockets and optimized Azure database queries, reducing response times and ensuring high data consistency across distributed service
- Built RESTful APIs and improved backend data flow and scalability

Project Highlights

Real-Time Court Management System (React \ Node.js)

- Built real-time case management features using WebSockets, enabling instant updates for judges and court staff
- Developed full-stack functionality with React and Node.js, ensuring reliable data flow and system stability
- Improved application responsiveness and user workflows through optimized state management and real-time communication

Banking Platform

- Developed banking applications with integrated chatbot features, improving customer interaction
- Engineered scalable full-stack solutions using React and Node.js in enterprise financial environments, enhancing system performance and reliability
- Integrated backend services and APIs, ensuring reliable, scalable communication across banking systems

Education

Faculty of Computer Sciences and Engineering - Skopje, Macedonia

Oct, 2020 - present
